DESCRIPTORS *Air Flow; Air Pollution; Elementary Education; Meteorology; Science Activities; *Science Experiments; Weather
IDENTIFIERS *Atmospheres

ABSTRACT

This book contains simple experiments through which students explore air and its properties. Some of the topics discussed include alternative energy, bacteria, carbon dioxide, motion, weather, and flight. Experiments include: blowing a balloon up in a bottle; seeing air in water; making a lunch-bag kite, weather vanes, and paper glider; windcasting experiment; and forecasting weather. (JRH)
